

Atlas Wealth Partners

Sales Agent Knowledge Base · v1.0 · May 2026

About us: Atlas Wealth Partners is a fee-only, fiduciary wealth-planning advisory firm based in Chicago. We serve high-earning US professionals with comprehensive wealth plans covering retirement projection, tax optimisation, equity compensation strategy, and estate basics. We do not sell products. We are paid one flat advisory fee, by the client, and our advice is optimised solely for the client's outcomes.

1. Ideal Customer Profile (ICP)

The agent should qualify every inbound caller against this profile. A "fit" caller meets at least **4 of the 5 criteria** below.

Criterion	Fit	Not a fit
Geography	US-based, any state	Outside the US
Age	35–60	Under 30 or in active retirement drawdown
Income	\$250k+ household OR \$500k+ investable assets	Under both thresholds
Profession	Working professional, founder, exec, equity-comp employee, partner-track	Day-trader, FIRE-only DIYer with no interest in advice
Trigger	Equity event, inheritance, marriage, kids, retirement planning, advisor change	"Just shopping" with no real timeline

High-net-worth flag

If the caller mentions investable assets over **\$5M**, they are above our standard service tier. The agent should NOT pitch the standard plan — escalate immediately to a senior advisor (route to seniors@atlaswealth.com).

Hard-disqualify list

- Outside the US (we are not licensed)
- Active SEC investigation, IRS enforcement, or known fraud history (a search-based pre-check happens via the CRM; flagged callers go straight to compliance)
- Looking for tax preparation only — refer to a CPA
- Looking for stock-picking or trading advice — we don't do that

2. Atlas Wealth Plan — Service One-Pager

The Atlas Wealth Plan is a comprehensive fiduciary wealth plan delivered over 60 days, with quarterly check-ins thereafter. Flat advisory fee. No product sales, no commissions, no kickbacks.

What's included

- **Retirement projection:** Monte Carlo simulation across 1,000 scenarios. Models savings rate, asset allocation, drawdown, Social Security claiming strategy, and longevity risk.
- **Tax optimisation:** Multi-year tax-loss harvesting plan, Roth conversion ladder analysis, charitable giving strategy (DAFs, QCDs), state-residency optimisation.
- **Equity-compensation strategy:** ISO/NSO/RSU exercise and sale planning, AMT modelling, 10b5-1 plan structuring, concentration-risk diversification.
- **Estate basics:** Beneficiary review, will/trust referral to partner attorneys, gifting strategy, life-insurance coverage analysis.
- **Quarterly check-ins:** 60-min reviews with a senior advisor. Plan refresh annually.

What's NOT included

- Active portfolio management (we model and recommend, you implement at your custodian)
- Tax-return preparation (we coordinate with your CPA)
- Will/trust drafting (we refer to vetted estate attorneys)
- Insurance product sales (we recommend coverage levels, you buy from a broker)

3. Fee Schedule

Tier	Profile	Year-1 Fee	Annual Renewal
Foundation	\$250k–\$1M investable assets	\$6,500	\$3,500/yr
Builder	\$1M–\$3M investable assets	\$9,500	\$5,500/yr
Architect	\$3M–\$5M investable assets	\$14,500	\$8,500/yr
Senior (referral only)	Over \$5M	Custom	Custom

Billed: 50% on plan kickoff, 50% on plan delivery (60 days later). All payments via Mastercard or ACH. We do not bill on assets under management. We do not earn commissions.

4. Objection-Handling Playbook

Use these responses verbatim or near-verbatim. Each ends with a soft re-direct to the discovery call.

1. "I already have a financial advisor."

Great — most of our best clients had one before we met. Quick question: is your current advisor fee-only, or are they paid commissions on what they sell you? If you don't know, we offer a free 30-minute second-opinion review where we look at your current plan and tell you honestly if you should stay or switch. No pressure either way. Want me to put 30 minutes on the calendar?

2. "It's too expensive."

I hear that often. Two things — first, our flat fee is usually a fraction of what people pay in hidden commissions and AUM fees elsewhere. For a \$1M portfolio, a 1% AUM fee is \$10,000 a year, every year. Our Builder plan is \$9,500 in year 1 and \$5,500 a year after. Second, the tax-optimisation work alone typically saves clients 3–5x the fee in the first year. Want to walk through the ROI on a 25-minute call?

3. "I'll think about it."

Of course — this is a real decision. Tell you what: I'll send over our 12-point planning checklist so you can see exactly what we cover, and I'll tentatively hold a discovery slot for next week. If you want to keep thinking, just cancel — no obligation. What email should I send the checklist to?

4. "Can you just send me information?"

Absolutely, I'll send our service one-pager and fee schedule right now. The thing is, the most useful 25 minutes you'll spend on this is going through it together — we can answer your specific questions and you'll know in 10 minutes whether we're a fit. Want me to book a no-pressure intro call when the materials land in your inbox?

5. "I can do this myself with a spreadsheet / [robo-advisor name]."

Totally fair — and for some people that's the right answer. The clients who get the most from us tend to have a complicated situation: equity comp, multi-state taxes, an inheritance, kids, business income. If your situation fits in a spreadsheet, save the money. If it doesn't, that's where we earn our fee. Want to do a quick fit check?

6. "How is this different from [Vanguard PAS / Fidelity / Schwab]?"

Two big differences. First, those are AUM models — they charge a percent of your portfolio, every year, forever. We charge a flat fee, billed once, with a flat annual renewal. Second, they primarily manage portfolios. We don't manage your portfolio at all — we build a comprehensive plan covering taxes, equity comp, estate, retirement, and insurance, and you implement at any custodian you like. Different product entirely. Worth a 25-minute walkthrough?

7. "I'm not ready — maybe in a year."

Got it. Quick question: is there a specific event you're waiting on — equity vest, job change, sale of a business? If yes, the planning needs to happen *before* the event, not after, to capture the tax window. If it's just timing, no pressure — should I follow up in a quarter?

8. "Are you a fiduciary?"

Yes — 100%. We are a fee-only, SEC-registered investment advisor (RIA). Fiduciary duty is the legal standard we operate under, in writing, on every engagement. Many advisors at brokerage firms operate under "suitability" instead, which is a lower bar. Happy to walk through the difference on a call.

5. Client Case Studies (Anonymised)

Case Study 1 — Tech Founder, Series-B Equity Event

PROFILE Founder, age 41, Bay Area. \$480k household income, \$2.4M investable, \$7M in illiquid founder stock. Came to us 4 months before a tender offer.

WHAT WE DID Modelled three exercise/hold strategies across QSBS qualification, AMT exposure, and concentration risk. Built a 10b5-1 sale schedule timed to the lockup release.

OUTCOME Captured QSBS exemption on \$4.2M of gain (saving ~\$1.05M in federal tax). Reduced concentration from 80% of net worth to 35% over 18 months without spooking the cap table.

"I would have left a million on the table without Atlas. The fee was a rounding error." — Client, anonymised

Case Study 2 — Dual-Income Couple, Retirement Reset

PROFILE Couple, ages 52 + 54, Chicago. Combined income \$620k, \$1.8M investable across 4 accounts at 3 custodians. Came to us frustrated with a commissioned advisor.

WHAT WE DID Consolidated to two custodians. Built a Roth-conversion ladder over the gap years between retirement and Social Security. Modelled a 1.5x increase in retirement spending capacity by changing claiming strategy and asset location.

OUTCOME Retirement-success probability moved from 71% to 94% in the Monte Carlo, without increasing savings rate. Saved an estimated \$180k in commissions over their previous advisor relationship.

Case Study 3 — Equity-Comp Senior Engineer

PROFILE Senior engineer, age 38, NYC. \$385k base, \$250k/year in RSUs vesting quarterly. \$900k investable, mostly in concentrated employer stock.

WHAT WE DID Built a sell-on-vest framework with state-tax overlay (NY → moved to FL during plan year). Optimised charitable giving via a DAF funded with appreciated employer stock.

OUTCOME Reduced employer-stock concentration from 62% to 28% over 24 months. Net tax savings on the FL move + DAF strategy: ~\$72k in year 1.

6. SEC Compliance Disclosures

- Atlas Wealth Partners LLC is an SEC-registered investment advisor (IARD #XXXXXX). Registration does not imply a particular level of skill or training.
- We are a **fee-only fiduciary**. We do not earn commissions, kickbacks, or revenue-sharing of any kind from any product provider.

- We do not custody client assets. All assets remain at the client's chosen custodian (Schwab, Fidelity, Vanguard, etc.).
- Past performance shown in case studies is not indicative of future results. Tax and dollar figures are illustrative; actual outcomes depend on individual facts and circumstances.
- The agent is required to open every recorded call with: *"Hi, this is the Atlas Wealth team. Just letting you know this call may be recorded for quality and compliance. Is that OK with you?"* Pause for verbal confirmation before proceeding.
- The agent must NOT make forward-looking guarantees ("you'll save X", "your portfolio will return Y"). Use ranged, conditional language instead.
- If the caller asks for our Form ADV Part 2, the agent emails it from disclosures@atlaswealth.com immediately and confirms delivery.

7. Calendar Booking SOP

1. Use the team Google Calendar shared at scheduling@atlaswealth.com.
2. Available booking window: **Monday–Friday, 9:00 AM – 5:00 PM Central Time**. No weekends, no holidays.
3. Slot length: **25 minutes** for discovery; **60 minutes** for plan kickoff (only after the discovery call).
4. Always confirm the caller's timezone before reading back the time. Read the slot in the caller's local time, not Central.
5. Send the calendar invite to the caller's stated email within 60 seconds of booking. The invite must include:
 - The Atlas Wealth Plan one-pager (PDF attachment)
 - The Zoom link in the calendar event description
 - The advisor's name + headshot in the description
6. If no slot is available within 5 business days, offer the caller a callback from a human SDR within 24 hours rather than booking 6+ days out.
7. If the caller no-shows, the agent sends a polite re-engage email at +24 hours and +5 business days, then stops.

8. Lead-Scoring Rubric

The agent must assign a lead score (Hot / Warm / Cold) before logging to HubSpot.

Signal	Hot	Warm	Cold
Income	\$500k+	\$250k–\$500k	Under \$250k
Investable assets	\$1M+	\$500k–\$1M	Under \$500k
Trigger event	Confirmed equity event, inheritance, sale	Anticipated within 12 months	None / unspecified

Signal	Hot	Warm	Cold
Timeline	This month / this quarter	This year	"Just exploring"
Current advisor	None or actively switching	Has one, considering change	Happy with current advisor
Discovery booked	Yes, within 7 days	Yes, beyond 7 days	No

Scoring: 4+ Hot signals → Hot. 3+ Warm signals → Warm. Otherwise Cold.

9. Frequently Asked Questions

Do you manage my investments directly?

No. We build the plan, you implement it at any major custodian (Schwab, Fidelity, Vanguard). This keeps our advice independent of any product or platform.

How long does the plan take?

From kickoff to plan delivery is 60 days. Quarterly check-ins start in month 4.

Can I cancel?

Yes — anytime, in writing. If you cancel before plan delivery, we refund the unearned portion of the fee.

Do you work with non-US clients?

No. We are SEC-registered for US clients only. We refer non-US callers to vetted partner firms when possible.

What if my financial situation is too complicated?

Complexity is exactly where we add the most value. The harder the situation — equity comp, multi-state taxes, business interests, inheritance — the more our flat-fee model pays for itself.

What if my situation is too simple?

If you have under \$250k in investable assets and a W-2 with no equity, you may be better served by a robo-advisor or a CFP at \$1k–\$2k. We'll tell you that on the discovery call if it's true.
